
QUEST FOR HOLLYWOOD

BIO

Quest For Hollywood was created because they wanted to make a change in the way people have viewed a normal DJ performance. Joining forces, Jonny Quest and Robert Michaels aka “Hollywood”, wanted to create something that not only captures it’s audiences, but they wanted to challenge the way people react to sight, sound and feel. They believe that a higher level of creativity is what makes a long lasting impact and brings people together.

Quest For Hollywood combines high energy, visually stimulating graphics and continuous sound of not one, but two live DJ’s. Each brings his unique style and music selection while integrating creative transitions between mixes of songs. The music for this show covers all genres and is perfect for any audience. The projections are created meticulously to change with each song and deliver astonishing content that is sure to leave your guests wanting more. Our custom set piece was designed specifically for travel, thus making it easily transportable nationwide.

Together, they have built a conglomerate of notables that features sharing the stage with International headliners, performing in front of Hollywood’s A-Listers and Fortune 500 companies. The collaborative efforts of these two world renowned DJ’s has resulted in a truly astonishing showcase.
